

COMMON SENSE Tattoo After Care Instruktionser:

The first rule is to use common sense ...

Do not touch or let others touch your new tattoo, unless their hands
is washed thoroughly ...

Keep your tattoo clean, and do not subject it to hostile environments or chemicals ...

Do not allow unqualified people to tell you what to do if you have a question,
consult your tattoo artist ...

Leave the plastic on for at least 5 hours ...

Wash gently with soap and water. This is an important step you must take care to remove all
traces of fat , blood and color ...

Dry, do not rub . Let dry completely before covering with clothing.
At places with a high numbers of bacteria
as example Feet change your clothes 2 times daily .

Do not compress the fresh tattoo with tight clothing or belts, etc. ..

We recommend you clean your hands with G-Line Disinfection Foam before the transfer of
G-Line Tattoo Aftercare Cream. You will obtain the best hygiene! G-Line Tattoo's
products do not contain alcohol, and provides long-term protection against bacteria and viruses
for up to 12 hours to the skin. Apply G-Line After Care Cream 3-5 times daily for 10 days,
or until your tattoo has healed.

If you use tight clothes - and at night, put tattoo goo and wrap your tattoo in normal domestic
film as we did in the store - it will keep your tattoo from drying out.

No tub , swimming or sauna at least two weeks ...

Do not expose to sun at least three weeks ...

don't scratch or otherwise traumatise your fresh tattoo ...

Your new tattoo will be healed after about two to three weeks. Maybe less ,
If you followed the instructions carefully ...

If you experience any types of problems, contact us immediately.

Enjoy your new tattoo - ELEKTRISK TATOVERING
