

# COMMON SENSE Piercing After Care Instruktioner:

The first rule is to use common sense.

Clean your hands thoroughly in G-Line Disinfection Foam before touching your piercing.

Clean your piercing 1-2 times a day with G-Line Disinfection Foam.

Use a cotton swab moistened with G-Line Disinfection Foam to clean the piercing.

Wash the piercing with intimate soap max 1-2 times a day when you are in the bath.

Rinse all soap residue away with the shower after washing.

Wipe the area with a clean towel after washing with soap.

By oral piercings rinse with  
chlorhexidine 0.05% 2 hours before or after brushing.

What is normal:

Right after it's made: bleeding, swelling and tenderness.

During surface healing (3-4 weeks): Tenderness and oozing yellow liquid.

What to avoid:

Solarium the first 3-4 weeks.

Swimming pools and other standing water in 3-4 weeks.

All products containing alcohol.

To clean more than recommended.

To touch your piercing more than necessary.

Jewelry with pendant as long as it heals.

Blows to the piercing.

Beauty Products such as make up near the jewelry.

Contact with foreign body fluids.
